

# SLIDER

**All Season All Surface Fun**

In the revolutionary new Slider you make the transition from land and race out to deep water, then turn into the shallows and keep flying until the water thins out to a glaze in the low tidal wash. You explore hidden places that few people ever see. You cross sand bars, beaches, estuaries and hover far inland up rivers, shooting the rapids and skimming over riverbed stones.

It's totally unrestricted freedom.

It's an exhilarating assault on the senses.

# SLIDER

THE ULTIMATE VEHICLE. The highly capable, state of the art light hovercraft with unsurpassed styling and performance. The unique lift, propulsion and skirt systems provide for easy driving, quiet operation, and a level of safety never achieved before. You deserve freedom of movement..... Power on a cushion of air..... SLIDER IS READY, ARE YOU?

## FEATURES

**Hull Design:** Constructed of strong lightweight GRP (fibreglass) **SLIDER**'s design offers excellent visibility and ease of control. The aerodynamic shape allows **SLIDER** to accelerate rapidly and slip through the air with ease. For stowage of jackets, light baggage, and camping, fishing, and hunting equipment, there are two generous compartments; one within the central well having easy access from under the motorcycle style seat and the other through the hatch in the front fairing. Marineised components and fittings are used exclusively throughout the craft.

**Flexible Skirt:** The skirt is a permanently pressured, twin-cell loop and segment design. Each segment is individually air-fed to provide reduced friction and a smooth ride over irregular surfaces. This unique design has three distinct advantages \* At speed the skirt provides **SLIDER** with great stability \* Should **SLIDER** have some degree of impact the loop acts as a fender to protect the structure of the craft and enhance passenger safety \* When at rest on the water the loop becomes a buoyancy chamber and **SLIDER** is a stable platform for fishing, duck-shooting, diving, or just relaxing.

**Motor and Fans:** **SLIDER** is powered by a reliable, compact, and lightweight German engine, delivering high torque at low rpm (ideal for long life) to drive the high efficiency lift and thrust fans. The motor, exhaust system, and lift fans are positioned rearward of the passenger seat and are totally enclosed for safe, quiet operation.

**Performance:** **SLIDER** is a fully amphibious hovercraft equally at home on water, swamp, snow, ice, or dry land and it smoothly transitions between them all. At speed **SLIDER** has practically no wake wash to damage river banks and it is the only surface craft which can pass over environmentally sensitive areas without disturbing the surface ecology. **SLIDER** is safer than the average powerboat having no underwater hull or propeller to endanger swimmers, aquatic life, or entangle ropes. A twist-grip throttle, handlebar steering and twin aerodynamic rudders offer the driver responsive control. With a full fuel tank it will cruise for 3 hours

Convenient Operators Position

Ergonomic Driving Position

External Refuelling

Reliable 70hp German Engine

Options - Trailer/Windscreen/Lights

## TECHNICAL SPECIFICATIONS

	SPORT	XL
Length.....	11'4"	13'7"
Width .....	6'2"	6'2"
Height.....	4'6"	4'6"
Weight .....	550lbs	575lbs
Payload.....	450lbs	650lbs
Seating.....	2 in-line	4 in-line
Hover-height .....	10" hard-structure clearance	
Buoyancy .....	1550lbs (loop cells)	
Motor.....	Hirth 100hp 3701V engine	
Electrical .....	12V, Electric Start	
Fuel.....	15gal, Unleaded Super 50:1 Oil Mix	
Economy.....	.5gph at cruise	
Hull.....	Glass Reinforced Plastic/PVC Foam/Kevlar	
Skirt.....	Permanently Pressured Loop and 77 Segments Nylon Reinforced PVC and Urethane	
Lift Fans .....	Two Composite Aerofoil Centrifugal	
Propulsion Fan .....	Three Blade Axial	
Transmission.....	Polychain GT2 Belt Drive	
Wave Capabilities.....	Up to 2' Short Chop, 3' Surf	
Max Speed.....	50mph (dependant on conditions and operator skill)	
Noise Level(cruise).....	92dBA at 30"	
Instrumentation.....	Tachometer, Hours, Temperature, Fuel, Volt	
Accessories.....	Fire Extinguisher, Bilge Pump, Air pump, Windscreen
